

Computing Vision

At St Mary's C of E Primary School, we aim to develop forward-thinking learners who use technology to enhance their research and presentation skills, as well as learn how to be respectful members of a digitally literate society. It is vital that children understand how to keep themselves, and others, safe online so they learn how to be respectful in the things they say and do online. They also know where to turn if they need assistance online. Our computing curriculum develops lifelong transferable skills that children can use to as they move through their education and later on, in the fast-moving technological world.

Our computing curriculum allows children to develop our values of **courage, respect** and **perseverance**. **Courage** to have a go at new ideas and use new technology (or new programs online); **respect** for others online, taught via discreet e-safety lessons, workshops and assemblies; and **perseverance** to debug a code and try again to reach an end goal. Our curriculum aims to promote curiosity, creativity and confidence when using technology in a variety of ways.
