

Geography Vision

St Mary's geographers enjoy a 'hands on', practical approach to their geography learning. We enjoy using atlases to locate places in the United Kingdom and the wider world, including Continents and Oceans on a map. We can explain what places are like in the World and can make comparisons with our understanding of the weather to discuss if places are hot or cold. We support our discussions with technical Geography language, describing and identifying key Geography features.

In our school we use the outside environment to support our learning in fieldwork and exploration. We take advantage of our own town's historical background particularly when thinking about human geography.

As a result of our exciting scheme of work we show a real sense of curiosity and show enthusiasm and passion towards Geography.
