

Science Vision

At St Mary's Primary School our vision is to give our children a science curriculum which enables them to explore and discover the world around them, confidently, so that they have a deeper understanding of the world we live in. To achieve this, it involves exciting, practical hands on experiences that encourage curiosity and questioning.

Our aim is that stimulating and challenging experiences help our children secure and extend their scientific knowledge and vocabulary.

We believe that these that are curriculum will ensure that our children are confident, life-long learners who are inquisitive and equipped with scientific knowledge and understanding to explore our ever changing world around them.
