Dear Parent / Carer,

Annual seasonal flu vaccination is now due

All children from reception to year 11 are being offered a free flu vaccination in school, as part of the national vaccination programme. Flu can be an unpleasant illness and make some people seriously ill. The flu vaccination is **safe and effective**. It helps to protect against seasonal flu and serious related complications, such as bronchitis, ear infections and pneumonia. It will also help to prevent the spread of flu and protect others who are vulnerable. There are two different types of vaccine available:

Nasal spray flu vaccine

This vaccine offers the best protection against flu. It is given as a spray, squirted up each nostril. It's quick and painless.

For some children the nasal spray is not suitable for medical reasons. Our team will review the medical information submitted before offering the flu vaccine.

The nasal vaccine contains traces of a highly processed form of porcine gelatine.

Flu vaccine injection

The injection is given into the muscle in the upper arm, which may cause soreness.

This vaccine is offered as an alternative if the nasal spray is not suitable due to medical reasons or personal choice. This vaccine does **not** contain porcine gelatine
